

Dataset Name: **LiDAR DSM** Date Released: **20-Jan-16**

Open Data Category: **Locations and Mapping** Business Unit: **Finance and ICT**

Dataset Group: **Elevation**

Data Description:

A digital surface model (DSM) at a resolution of 1 m that shows the topography of the land. The DSM is representative of the land with taking into account the trees and buildings.

Data Purpose:

The original LiDAR data that the DSM was derived from was captured by PHB Lasermap for HRM in April 2007 and was processed by Applied Geomatics Research Group at NSCC in 2012.

Notes or Disclaimers:

This is a raster image file type that can be utilized by ESRI's free mapping software, ArcGIS Explorer.
