

Dataset Name:

Open Data Categories

Date Released:

Data Description:

A seamless hydro-flattened digital elevation model (DEM) with 5 metre resolution. The DEM is what is called a bare earth model; in that the elevation model is representative of the land without taking into account the trees and buildings.

Data Purpose:

The LiDAR data was captured for the Halifax Regional Municipality's coastal flood mapping project through topographic and topo-bathymetric lidar data collection in 2017-2018 and was processed by the Applied Geomatics Research Group at NSCC.

Notes or Disclaimers:

Vertical datum is cgvd2013
